—Harry Miller returned last week from a couple of weeks' fishing in and around Livingston, Montana, where he went with Dr. E. E. Bullock. He reported fishing fine, and that Dr. Bullock would remain for a couple of weeks longer. George Patton, chapter master here, and he certainly know a thing or two. We acknowledge receipt of a nice string of trout—gum, yum.

—In our election table last week, we failed to place the letter "R" by some error, unaccountable, after the name of T. E. Wilson, Republican candidate for collector. However, we do not believe this was necessary, for everyone knows that T. E. Wilson, his father, and every member of that family, are all staunch Republicans.

—Judge Dungan has rented the Dr. Kearney property, which he will occupy about the middle of September.

THE FARMER'S OPPORTUNITY

We believe in the corn and wheat belt land. We believe in the corn and wheat belt farmer, believe that the soil, climate, and markets, considered, it is today the cheapest land on earth.

The population of the U. S. doubles every 25 years, but the acreage of land, best adapted to corn and wheat, remain the same, and the cry for food for the multitudes never cease.

The Federal Farm Loan Act became a law July, 1916. Its purpose was for the standardization of farm mortgages and the financing of the ownership of farm lands for longer periods than the existing practices.

Do you know what the interest will be on farm loans next year or any year in the future? No, you do not.

Will you let us guarantee you a loan at a cost to you on an average of 4 per cent for 33 years? No, we do not tie up your farm for 33 years, you can pay a part or all of the loan anytime after five years, or in case of a sale before five years.

Every farmer who has initiative and is progressive should investigate this loan system.

To illustrate:—

You borrow \$20,000 on the old plan, renewing every 5 years, at 6 per cent for 33 years, is \$39,600 interest. You still owe the principal.....\$20,000

A Total of.....\$59,600

On the new plan you borrow \$20,000 for 33 years, each year your interest becomes less and each year your principal becomes less by the amortization plan, authorized by Federal Farm Loan Act.

You pay a total in interest and principal or \$46,084.00 or a difference of \$13,515.40, you have saved on the loan by the system under the Federal Land Bank Act.

We make loans only in Kansas and Missouri, on the best land of each state.

Come and let us explain fully if id need of a loan of renew your old loan now, so you will be absolutely independent for 33 years.
